SUMMARY

Software Engineer with 3+ years of experience building scalable, high-performance web applications and backend systems. Delivered 15+ production-grade projects and 40+ AI/web builds. Specialized in system architecture, performance optimization, and AI-powered automation. Proven track record of reducing latency by up to 40%, improving system efficiency, and designing end-to-end solutions used by real users in production environments.

EXPERIENCE

Full-Stack Developer

DEC 2025 – PRESENT

NEXUS SP SOLUTIONS · Freelance

- Architected and deployed full-stack ecommerce platforms handling 1K+ monthly users using Next.js, NestJS, and PostgreSQL.
- Designed scalable REST APIs and optimized database queries, reducing response time by ~35%.
- Implemented AI-based automation workflows for product recommendations and customer interaction.

Software Engineer

JUN 2025 – JAN 2026

Evtaar · Remote

- Developed high-performance frontend systems using React and backend services in Go for scalable applications.
- Improved frontend load time by 30% through code-splitting and optimization techniques.
- Built concurrent backend services handling multiple requests efficiently.

Full Stack Engineer

AUG 2023 – MAY 2025

People Maketh · Remote

- Delivered end-to-end web applications with third-party API integrations and scalable database design.
- Improved system reliability and reduced bugs by implementing structured backend architecture.
- Worked on multiple client projects across different domains.

Frontend Developer Intern

FEB 2023 – JUL 2023

Encrobytes · On-site

- Built responsive UI components using HTML, CSS, and JavaScript.
- Improved UI consistency and reduced design bugs across multiple pages.
- Collaborated with designers to implement pixel-perfect layouts.

EDUCATION

Aggarwal College, Ballabgarh

B.Voc in Software Development (2022 – 2025) | CGPA: 8.8

Pal Public Sr. Sec. School

Commerce (2021 – 2022) | 81%
